1. Introduction

1.1 Epping Forest District is a mainly rural District in the south-west of Essex abutting Greater London, Harlow and Hertfordshire. 92.4% of the District is within the Metropolitan Green Belt. The south west of the District is the most densely populated and includes Loughton, Buckhurst Hill, and Chigwell. Much of the rest of the population is located Epping, Waltham Abbey and Chipping Ongar. There are many villages and smaller rural settlements, predominantly towards the north of the District.

1.2 The District is located at the eastern end of the London Underground Central Line and contains eight stations on this line. There is one mainline railway station in Roydon, which is on the London Liverpool Street – Stansted – Cambridge line. Other railway stations are close to the District at Sawbridgeworth, Harlow, Broxbourne and Waltham Cross.

1.3 The M25 runs east-west through the District, with a local road interchange at Waltham Abbey (J25). The M11 runs north – south, with a full interchange (J7) at Hastingwood just south of Harlow, and a northward –off/ southward- on interchange at Loughton. There is also a motorway only interchange at the M11/M25 (J6/J27) south-east of Epping. The A414 is a key east-west route and this crosses the District from Harlow to Ongar on the way to Chelmsford and the Essex coast.

1.4 The District is approximately 130 square miles in area, and contains 20 parish councils and 4 town councils. The 2011 Census recorded a population of about 124,660 people living in close to 52,000 households.
1.5 The current Local Plan was adopted in 1998 with subsequent Alterations adopted in 2006. The Council is currently preparing a new Local Plan for the District covering the period up to 2033. This document forms part of the evidence base for the emerging Local Plan.

National Planning Policy Framework

1.6 The National Planning Policy Framework (NPPF) (March 2012) includes the key theme of achieving ‘sustainable development’ (NPPF para. 14). Sustainable development combines three elements; environmental, social and economic sustainability. These three elements must be balanced in preparing Local Plans and reaching decisions on planning applications.
1.7 The core principles of the NPPF reflect the need to identify and plan for the housing, employment and other needs of an area. The principles also emphasise the preference for efficient use of resources by prioritising development on previously developed land and, where appropriate, reuse of existing buildings whilst protecting natural assets. The NPPF highlights the importance of town centres, stating that these should be supported through positive planning policies which encourage their viability and vitality. It recognises that identified centres are preferable locations for development. In more rural locations, there is strong support for (i) retention, and making best use of services and facilities, including sustainable modes of transport, and (ii) growth of rural businesses.

Purpose of this Technical Paper

1.8 This document establishes a hierarchy of settlements within the District, and identifies relationships with settlements outside the District. This will subsequently be used to inform the preparation of the Local Plan, and in considering planning applications. It is therefore a planning tool which identifies how existing settlements function and establishes a measure of relative sustainability of and between those settlements.
2. Methodology

2.1 While there is no set methodology in establishing a hierarchy, there is a wealth of information which can be used to determine how settlements function in relation to each other.

2.2 Analysis of a number of factors has been undertaken to establish the most reasonable settlement hierarchy to support the preparation of the Local Plan. These data sources include:

- Review of adopted planning policy
- Review of approach by neighbouring authorities
- Emerging Sustainability Appraisal for the Local Plan
- Findings of Epping Forest District Transport Accessibility Analysis
- Town Centres Study (2010)
- Economic and Employment Evidence to support the Local Plan and Economic Development Strategy (emerging, 2015)
- Historic Towns Report (Essex County Council 1999) and Heritage Asset Review (2012)
- Census 2011 (ONS)
- Brief profile of each town/village in the District, and where appropriate, consideration of neighbouring towns/villages

2.3 Following review and analysis of the above, and drawing on good practice where this exists, this analysis has established a settlement hierarchy.
3. Analysis

Adopted Policy Approach

3.1 The adopted Local Plan (1998 as amended 2006) does not contain a settlement hierarchy. There are however, policies which take a selective hierarchical approach in respect of different topic matters.

3.2 Policy GB16 (1998 Local Plan) identifies the settlements that could be suitable for the provision of affordable housing. 10 small villages are identified by the policy, but it is not clear from the supporting text how they were selected. A further six settlements are identified as not being appropriate for affordable housing, but the justification is again unclear.

3.3 Policy TC1 (2006 Local Plan Alterations) identifies a hierarchy as it relates to retail centres in the District. Four categories are identified, and all of the town/village centres and local shopping parades are allocated to these categories.

3.4 The full text of both of these policies is contained in Appendix 1.

Approach of Neighbouring Authorities

3.5 Some analysis of the approach taken by neighbouring authorities has been undertaken (Appendix 2). The four adjoining London Boroughs, the Borough of Broxbourne and Harlow District, have adopted various approaches to establishing a hierarchy of town centres. The remaining four authorities, using different methodologies have established hierarchies which group together towns and villages in accordance with the availability of services and facilities.

3.6 The hierarchy for this District has regard to the way in which settlements relate to towns and villages beyond the administrative boundary. There is no single method used by the neighbouring authorities which stands out as being entirely appropriate for this District.
Sustainability Appraisal (SA) Process

3.7 An on-going SA process is required as part of the preparation of the Local Plan, which assesses the relative sustainability of the strategy and policy alternatives. A number of indicators have been identified as part of this process and all Strategic Land Availability Assessment (SLAA) sites have been measured against them as an initial assessment:

- Air quality
- Biodiversity
- Climate Change (includes accessibility criteria)
- Community and Wellbeing (includes accessibility criteria)
- Economy
- Historic Environment
- Land Use
- Landscape
- Water

3.8 Given the wider remit (and legislative background) of the SA there are several indicators more criteria within the SA than are directly relevant to establishing a settlement hierarchy. Therefore, the SA work has been reviewed, and those criteria that provide a direct measure of overall functionality of a settlement are incorporated. These indicators fall within the Climate Change and Community and Wellbeing sections.

Accessibility Analysis

3.9 EFDC commissioned Essex County Council (ECC) to undertake an assessment of the relative accessibility of the District, in addition and further to, the SA process (see section above). The ECC study maps the existing provision public transport, cycle networks and public rights of way, and to (non private) education and health facilities. It then produces an analysis of sites that have been submitted to the SLAA process. The output of this work shows the most accessible potential sites in the District based on the current level and range of services.
3.10 The ECC assessment maps the bus stop locations and service frequencies and subsequently provides a weighted score to each SLAA site location. The mapping highlights the key bus routes (but does not show individual services) and the frequency of the overall level of service. This approach is sufficient to establish the overall accessibility of locations using sustainable modes of transport as a measure. Further detailed study of the bus network and contact with the bus operators will be required in due course. Bus frequency information is included in the settlement profiles at Appendix 3, but should only be used as an initial indicator of overall accessibility. For the purposes of this assessment, a two stage scoring system has been devised for bus services. This considers the frequency of services and the routes available. Where the service is infrequent and/or there are limited weekend services, the bus service is categorised at “level 1”. Where there is a daily service, and in excess of (on average) 40 departures per day, this is awarded “Level 2”.

3.11 This study shows that, due to a combination of (i) a frequent bus service, (ii) Central Line stations, and (iii) a range of education and health facilities the more densely populated settlements have a greater level of accessibility. This applies particularly to Loughton, Buckhurst Hill and Chigwell. Other areas that score well are where a high frequency bus route runs along a main road. Examples are Thornwood, and the area of Chipping Ongar that is immediately around the A414/B184/A113 (Four Wantz) junction.

Town Centres Study

3.12 There is no set methodology for establishing a town centres hierarchy, although the NPPF (paragraph 23) requires that local planning authorities should “define a network and hierarchy of centres that is resilient to anticipated future economic changes”. The town centres hierarchy will form part of the relevant suite of Local Plan polices that address retail and town centre matters.

3.13 The Town Centres Study was completed by Roger Tym & Partners in May 2010, and still provides the most up-to-date information on the town centres
and other shopping areas in the District. This study undertook a “health check” for each of the main centres (Buckhurst Hill, Chipping Ongar, Epping, Loughton Broadway, Loughton High Road and Waltham Abbey), and subsequently assessed the role and function of the centres. This study suggested a revised hierarchy (from that included in the 2006 Local Plan Alterations) for the six main centres as follows:

- Town Centre – Epping, Loughton High Road
- Small District Centre – Buckhurst Hill, Chipping Ongar, Loughton Broadway, Waltham Abbey

3.14 Given the age of the Town Centres Study, and the further change in the performance of the identified centres that has likely taken place since the report was completed, it is not appropriate to use this recommended hierarchy as the sole indicator of the hierarchy of settlements. This study does confirm that the larger settlements contain the largest and most successful town centres. The elements of these centres which contribute most readily to overall sustainability are identified in Table 1 below, and are the types of uses that are in demand frequently to meet every day needs.

**Employment Provision and Emerging Studies**

3.15 It is very difficult to measure employment provision at a settlement level, as ‘Travel To Work’ data (which analyses commuting patterns and locations of homes and employment) is only published once a decade (following a Census), and this data is understandably skewed by the large amount of commuting which takes place to and from London. There are many people who live in Epping Forest District who work outside it, and conversely there are people who live outside Epping Forest District but work within it. Roughly half of the District’s resident working population commute to London. Given the geographical location of the District, bordering Greater London, this pattern of commuting is unlikely to change significantly in the short-term.

3.16 At a District level, much of the employment is in the service sector, often meeting the needs of local residents rather than exporting services to other
areas. The construction sector is also strong. There is significant ‘leakage’ of comparison retail spend, i.e. many of the District’s residents choose to shop outside of the District for items like clothing, furniture and major home appliances, so this spending ‘leaks’ out. Again this is not surprising given the relatively small nature of the District’s town centres compared to other areas within reach, such as Harlow, Romford, Enfield, and Brentwood.

3.17 The way in which the local employment market functions, and further how this relates to the Housing Market Areas that exist across the District, is subject to further study. Initial findings suggest that, as expected, Epping Forest District is not a self contained economy, but part of an economic geography, reflecting that economies do not respect administrative boundaries. Firstly Epping Forest District has good economic links southwards with London, and also to the north with Harlow. There are also less strong economic links between Epping Forest District and East Hertfordshire, Uttlesford, Brentwood, Chelmsford, Broxbourne, Enfield, Stansted, and Cambridge.

Historic Environment

3.18 The historic environment plays a role in the way in which settlements in the District have developed and changed over time. National policy on protecting and enhancing the historic environment is contained within the NPPF (chapter 12). This broadly states that heritage assets are an irreplaceable resource and measures should be taken to preserve them in a manner appropriate to their significance. The NPPF also relates Green Belt policy to historic towns, one of the roles of the Green Belt being “to preserve the setting and special character of historic towns” (NPPF, para 80).

3.19 The “Historic Towns Supplementary Planning Guidance” was produced by Essex County Council in 1999, and was subsequently adopted by Epping Forest District Council. This guidance identifies settlements within the County which could be considered to have an “urban status” prior to 1700, and in which there are archaeological and historic remains that require protection. Three historic towns are identified in this guidance. Chipping Ongar and Epping are of importance as examples of small medieval and post-medieval
market towns, and Waltham Abbey is of importance as an ecclesiastical centre, and because of the history of the Royal Gunpowder Works.

3.20 The development of the railway (now Central Line) from London originally to Loughton (later extended to Epping and Chipping Ongar), significantly influenced the growth and development of, and consequently shaped the way in which Buckhurst Hill, Chigwell, Loughton/Debden, Theydon Bois and Epping function today as service centres and key locations for people that commute into London for work. This reflects the role of the overall historic environment (beyond those assets that are designated) in shaping the evolution of settlements.

Identifying Services & Facilities

3.21 The settlement hierarchy is determined by identifying the range of services and facilities available within each place.

<table>

</tr>
</tbody>
</table>

Education

3.22 There are different tiers of education facilities in the District, catering from nursery school provision through to higher/further education. There are currently 38 primary schools and six secondary schools, with the secondary schools being focused to the south west of the District. Epping Forest College
and the University of Essex campus in Loughton provide the only higher/further education campuses in the District, that are not associated with existing secondary schools i.e. sixth forms. Nursery provision is available at a mixture of facilities within existing primary schools, and bespoke operations. Private education establishments are not included in this assessment, as they are not available to the general public.

Health

3.23 There is no hospital providing an Accident and Emergency service in the District, with the nearest facilities being in Harlow (Princess Alexandra Hospital) or Leytonstone (Whipps Cross Hospital). St Margaret’s hospital in Epping provides some outpatients and “poly clinic” type services. Where private medical facilities exist these have not been recorded in this exercise, as they are not available to the general population of the District. There are general practitioner surgeries in most larger settlements, and in some cases there are several practices.

3.24 Availability of dentist practices varies, and the role of the NHS in providing these is rapidly diminishing. As a result of this, all dentist practices (NHS and private) are included in this assessment. Both opticians and pharmacies are often within main retail centres, and are generally owned and operated by the private market.

Rail Transport

3.25 There is only one National Rail railway station in the District in Roydon, and another on the District boundary with East Hertfordshire at Sawbridgeworth. Further railway stations that are reasonably accessible to Epping Forest District residents are available at Harlow, Broxbourne, Waltham Cross, and Chingford, and more distant at Brentwood and Chelmsford. Although there are existing relationships between settlements in the District and these railway stations, it is not possible to gauge precisely the extent to which they are used by residents, and therefore the impact they may have on the way settlements function. Further, Crossrail is due to begin operations at Shenfield in 2019,
but again the relationship between Shenfield/Brentwood and settlements in the District in this respect cannot be quantified. To this end, no allowance is made as part of this exercise for stations outside the District, with the exception of Sawbridgeworth station. This is because Lower Sheering and Sawbridgeworth are effectively connected along Station Road, and the station is on the boundary between Epping Forest District/Essex and East Hertfordshire/Hertfordshire.

3.26 Eight stations of the London Underground network are within the District. Three of these (Roding Valley, Chigwell and Grange Hill) are on the Fairlop loop, and therefore have a more restricted service than the main Central Line that runs to Epping. For this reason, a two stage scoring has been created for the Central Line stations, with those on the Fairlop Loop receiving one point, and those on the main line to Epping scoring two points.

3.27 There are on-going concerns about the capacity of the Central Line and the mainline rail services, and the Council continues to liaise with London Underground and the rail providers on these matters. It is not within the remit of this Technical Paper to determine the likely future capacity of the overall rail network, although this will be addressed in more detail as the preparation of the Local Plan progresses.

Retail

3.28 The retail facilities included in this assessment are those that provide vital services, although it is also helpful to recognise that many services that were once only available “in person” are now available on line, therefore changing the role of retail premises within settlements. The retail uses that have been identified are those that provide for usual daily demands, and which contribute to the health and vitality of a settlement.

Community Facilities/Services

3.29 The community facilities/services that are identified are those which help to create a sense of cohesion and community spirit within settlements. Such
facilities are often community hubs providing a range of services (e.g. community hall), or provide an essential service to the way in which a settlement operates (fire station, police station). Two categories are included for “leisure/sports facilities” and “recreational amenities”, with the intention being to note the difference between facilities that include a built element that is integral to the operation of the facility, and those that do not. Information contained in the “Epping Forest Open Space, Sport and Recreation Assessment” is used to inform this part of the assessment.

Population

3.30 The population of a settlement is not, in itself, an indicator of where a settlement should be placed within the hierarchy. Generally settlements with a larger population have more services and facilities for that population, however this is not always the case. A matter to be considered in detail whilst progressing the preparation of the Local Plan is the relationship between the overall population, and the number of services and facilities available and whether these are sufficient to meet the needs and demands of that population.

3.31 For the purposes of this Technical Paper, the population of the settlements has been derived from Parish and Ward based Census (2011) data.

Influences outside Epping Forest District

3.32 In all locations in the District, there is an influence created by the proximity to London and the extensive employment, retail, leisure and other services and facilities that are available. It is not possible to comprehensively measure the full impact of London on the District, although various datasets exist which have attempted to quantify this. For the purposes of establishing a settlement hierarchy for Epping Forest District, the overall influence of London is noted, but this does not form a key part of the analysis. Other larger towns and cities are nearby and these include Harlow, Cheshunt, Broxbourne, Brentwood, Stratford, Ilford, Romford, Chelmsford and even Cambridge. All of these, and others, influence the work, leisure and travel patterns of the residents of
Epping Forest District to varying degrees. There are some instances where settlements within the District form a continuous built area with settlements outside the administrative boundary, and in these cases the relationship will be examined more closely by the settlement profiles.

Measuring Relative Sustainability

3.33 A brief profile of the towns and larger villages in the District was included in the “Planning Our Future: Community Choices – Issues & Options for the Local Plan” consultation document published in 2012. Appendix 3 contains a series of tables identifying the services and facilities that are available in the settlements in the District. The relative sustainability of each settlement is scored on the basis of the presence of each type of service and facility. Where more than one instance of a particular type is found in a settlement, this is still scored once, for example if a settlement has two primary schools the settlement still only scores once for that category. The totals indicate the category that each settlement should be placed in. In addition, further analysis has been undertaken which also takes a qualitative approach to the assessment. This builds on the initial analysis included in the 2012 consultation document, and seeks to provide a rounded overview of each settlement. Whilst the scoring may suggest a settlement should fall into a particular category, the qualitative analysis may indicate that a settlement more comfortably fits into a different category. As identified at the outset, the assessment process is not absolute, and cannot be fully defined by categories that will suit all eventualities. The methodology provides a logical and robust approach, which by its nature must be flexible to suit the differing character of the District’s settlements.
4. Settlement Hierarchy for Epping Forest District

4.1 The categories for settlements have been established using non-technical terms. These are:
   - Town
   - Large Village
   - Small Village
   - Hamlet

4.2 There are several definitions of these categories, and no single accepted definition in planning terms. Table 2 is based on a combination of sources, including the Oxford English Dictionary, existing Local Plan policies and text, and judgement reflecting the research undertaken. The table also shows the scores that are allocated to each settlement type.

4.4 The final settlement hierarchy for the District is as follows:

**Table 4 – Epping Forest District Settlement Hierarchy**

<table>
<thead>
<tr>
<th>Category</th>
<th>Settlement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Town</td>
<td>Chipping Ongar, Epping, Loughton/Debden, Waltham Abbey</td>
</tr>
<tr>
<td>Large Village</td>
<td>Buckhurst Hill, Chigwell, North Weald, Theydon Bois</td>
</tr>
</tbody>
</table>

4.5 Determination of appropriate settlement boundaries is a matter for the emerging Local Plan. For the avoidance of doubt at this stage, boundaries created by the existing Green Belt policy boundaries will serve as settlement boundaries.
Appendix 1 - Adopted Local Plan Policies Showing Selective Hierarchical Approach
POLICY GB16 – AFFORDABLE HOUSING

PLANNING PERMISSION MAY BE GRANTED FOR SMALL-SCALE "AFFORDABLE" HOUSING SCHEMES WITHIN THE SMALLER SETTLEMENTS, AS AN EXCEPTION TO THE NORMAL POLICY OF RESTRAINT, WHERE THE COUNCIL IS SATISFIED THAT:

(i) THERE IS A DEMONSTRABLE SOCIAL OR ECONOMIC NEED FOR THE ACCOMMODATION IN THE LOCALITY WHICH CANNOT BE MET IN ANY OTHER WAY AND WHICH CAN REASONABLY BE EXPECTED TO PERSIST IN THE LONG TERM. AN APPLICATION WOULD BE EXPECTED TO BE SUPPORTED BY THE LOCAL PARISH COUNCIL AND A PROPER APPRAISAL OF NEED;

(ii) THE DEVELOPMENT IS WELL-RELATED TO THE EXISTING SETTLEMENT AND THERE IS NO DETRIMENT TO THE CHARACTER OF THE VILLAGE OR THE COUNTRYSIDE, OR TO GREEN BELT OBJECTIVES. PROPOSALS INVOLVING EXTENSIONS INTO THE OPEN COUNTRYSIDE OR THE CREATION OF RIBBONS OR ISOLATED POCKETS OF DEVELOPMENT SHOULD BE AVOIDED. THERE SHOULD BE NO SIGNIFICANT GROUNDS FOR OBJECTION ON HIGHWAYS, INFRASTRUCTURE OR OTHER PLANNING GROUNDS; AND

(iii) SUITABLY SECURE ARRANGEMENTS WILL BE MADE TO ENSURE THE AVAILABILITY OF THE ACCOMMODATION, AS BUILT, FOR INITIAL AND SUBSEQUENT LOCAL NEEDS HOUSEHOLDS WHOSE TOTAL INCOME IS INSUFFICIENT TO ENABLE THEM TO AFFORD TO RENT OR BUY

5.71a Not all settlements are appropriate for an affordable housing scheme, however. To be suitable they are likely:
- to have a recognisable community which is distinct and separate from that on the edge of the metropolitan area; and
- to be too small to be capable of offering sufficient alternative housing to meet local needs.

5.72a Settlements which could therefore be suitable include Epping Green, Matching Tye, Matching Green, Moreton, Sheering, Fyfield, Willingale, Toot Hill, Little End and Stapleford Abbotts. Those which would not be appropriate include Lower Nazeing, Theydon Bois, Chigwell Row, North Weald Bassett, Sewardstone and Chipping Ongar.

11.5a This District includes three principal centres (Epping, Loughton High Road and Waltham Abbey). The nearest sub-regional centres are Harlow and Chelmsford. Shopping habits are also influenced by centres in neighbouring authorities such as Ilford and Romford. Additionally larger centres further afield such as the West End of London and major shopping centres such as Bluewater, Brent Cross and Lakeside also affect shopping patterns.

11.6a Principal centres within this District therefore need to safeguard their character and enhance their role because of competitive pressure from these larger shopping centres.
### POLICY TC1 - TOWN CENTRE HIERARCHY

Applications within town centres for retail and other appropriate uses, including extensions to existing stores, will be determined in accordance with the hierarchy which exists in the district:

<table>
<thead>
<tr>
<th>Level</th>
<th>Centres</th>
</tr>
</thead>
<tbody>
<tr>
<td>(i) Principal:</td>
<td></td>
</tr>
</tbody>
</table>
  • Epping;  
  • Loughton High Road;  
  • Waltham Abbey |
| (ii) Smaller: |  
  • Loughton Broadway;  
  • Chipping Ongar |
| (iii) District: |  
  • Buckhurst Hill - Queens Road (East) |
| (iv) Local: |  
  • Abridge  
  • Buckhurst Hill – Loughton Way, Lower Queens Road, Queens Road West, Station Way  
  • Chigwell - Brook Parade, Limes Farm, Manor Road  
  • Cooper Sale - Parklands  
  • Chipping Ongar – Lower High Street, St Peters Avenue, Fyfield Road  
  • Epping – Lindsey Street  
  • Loughton – Borders Lane, Goldings Hill/Lower Road, Pyrles Lane, Roding Road/Valley Hill  
  • Nazeing – Nazeingbury Parade  
  • North Weald – High Road  
  • Theydon Bois – Coppice Row/Forest Drive  
  • Waltham Abbey – Highbridge Retail Park, Ninefields, Roundhills, Upshire Road |

The Council will, in principle, permit proposals which should sustain or improve the vitality and viability of any of the centres, and which will either maintain or not adversely affect their position in the above hierarchy. Larger-scale development is therefore only appropriate in the principal centres. Proposals for retail and other town centre uses on edge-of-centre or out-of-centre sites will be assessed in terms of (i) whether they adversely affect the vitality and viability of existing centres within the district; and (ii) all other plan policies.

Appendix 3 - Epping Forest District Settlement Profiles
Population and housing figures are based on Lambourne Parish, and so this also covers a substantial rural area including the Hamlet of Lambourne End.

**Existing Services & Facilities**

**Education**

- Nursery / Childcare: Y, Abridge Pre-school Group
- Primary: Y, Lambourne Primary School
- Secondary: N
- Higher / Further: N

**Health**

- GP: Y, Abridge Surgery
- Dentist: N
- Optician: N
- Pharmacy: N
- Hospital: N

**Transport**

- Bus Service (Level 1): Y, 40 departures/arrivals daily on weekends, plus weekend services, connecting to Harlow, Epping, Loughton and Romford. (Routes 541 and 575)
- Bus Service (Level 2): Y
- Rail Station: N
- Underground Station (Loop): N
- Underground Station (Direct): N

**Retail**

- Post Office: Y, Sub Post Office (within Londis, 24-25 Fir Trees, Abridge)
- Local Shop: Y, Market Place, Silver Street, Willow Tree Close, Market Place, London Road local shop retail shops, Shell & Mace, Londis.
- Supermarket (over 3,000 m²): N
- ATM: Y, Shell Garage
- Bank: N

**Community Facilities & Services**

- Place of Worship: Y, Abridge Evangelical Church, Holy Trinity Church
- Community Hall: Y, Abridge Village Hall
- Fire Station: N
- Leisure/Sports Facility: N
- Recreational Amenities: Y, Abridge Cricket Club.
- Library: N
- Police Station: N
- Citizens Advice Bureau: N
- Public Car Park: N

**TOTAL**: 12

**Qualitative Analysis**

Abridge is in the south east of the District, to the east of the M11 and to the north east of Chigwell. The River Roding passes to the north of the settlement, and the flood plain for the river extends across much of the area between the M11 and the north of the settlement. Abridge contains a number of key services and facilities, but contains only local shops. The historic core is protected by a Conservation Area, with 1950s residential development to the south of Ongar Road. The settlement is surrounded by the Metropolitan Green Belt, which has largely prevented the outward spread of Abridge since its designation.

**Settlement Category**

Small Village
### Buckhurst Hill

<table>
<thead>

Qualitative Analysis

Buckhurst Hill is in the south west of Epping Forest District, and immediately adjoins the southern District boundary with London Borough of Redbridge. The settlement saw rapid expansion in the late Victorian period and early 20th Century as a result of the opening of Buckhurst Hill Station in 1856. The Central Line now passes north-south through the eastern part of the settlement, with the “Fairlop loop” branching further east towards Chigwell at the southern edge of the settlement. Both Buckhurst Hill and Roding Valley stations are within Buckhurst Hill, therefore resulting in the maximum possible score being achieved, the only instance of this in the District.

The main retail centre is at the eastern end of Queens Road, and contains a Waitrose supermarket and a number of other retail units, including independent shops, bars and restaurants. There is a smaller area of retail units further west along Queens Road, meaning the retail centre is essentially split into two parts. The nature of the overall offer in Buckhurst Hill has changed in recent years, with the centre now containing even fewer “traditional retail” units than previously. However this is also reflective of the nationally changing role and nature of town centres.

The settlement creates a largely continuous built area between the outer edges of Woodford and Woodford Green to the south, and Loughton to the north. It is compact in nature, is of urban character, and is the most densely populated settlement in the District.

Remaining areas of open land are largely owned and managed by the City of London Corporation as part of Epping Forest. The River Roding passes to the east of the settlement within the Roding Valley Meadows Local Nature Reserve (including part that is designated as a Site of Special Scientific Interest) constraining the further eastward growth of the settlement.

Strong representations were received from local representatives on the position of Buckhurst Hill in the Settlement Hierarchy. The numerical score suggests Buckhurst Hill is a town, however representations made suggest that Buckhurst Hill would be more appropriately categorised as a large village. The key reasons for this assertion are that there is no bank, built leisure centre, state secondary school, fire or police station in Buckhurst Hill, in comparison to other settlements in the town category, that do largely have these facilities. Further, the existing Town Centre Partnership has recently been rebranded as Buckhurst Hill Village Forum.

Buckhurst Hill sits at the lower end of the town category following the quantitative assessment of available services and facilities. Given the strong local representations it is considered, on balance, that Buckhurst Hill should be categorised as a large village.

**TOTAL**: 4

### Qualitative Analysis

Bumbles Green is a small settlement in the west of the District, to the south east of Nazeing. There are few services within the settlement, and residents would have to travel for the majority of daily demands. There is a reasonable local bus service, connecting Bumbles Green to Lower Nazeing, Waltham Abbey and Harlow. Lower Nazeing is close by, and provides a primary school, local shops and a doctors surgery.

### Qualitative Analysis

Chigwell Row is at the southern boundary of Epping Forest with the London Borough of Redbridge and the London Borough of Havering, directly to the east of Chigwell. It is separated from the outer edges of Hainault by Hainault Forest Country Park and a small area of Green Belt land to the south of Lambourne Road. Land to the north is less developed, and contains a large reservoir.

The primary school is to the eastern end of the settlement, with other local shops focused on Lambourne Road.

Chigwell Row primarily functions as part of Chigwell, and at a wider level as part of the outer edge of...
Hainault, with residents having to travel to access the majority of services.

**TOTAL** 20
Qualitative Analysis

Chigwell is to the south of Epping Forest District, immediately adjoining the outer edges of the London Borough of Redbridge. There are two distinct areas within the settlement, the older area in and around Chigwell village and the golf course, and the newer development that focuses around the Limes Farm Estate and Grange Hill station. The scoring of the settlement reflects these two distinct areas being counted as a single settlement, and as result a higher score has been achieved.

In considering the character of the settlement, there is an argument that because of the split nature of the settlement that Chigwell as whole operates as two large villages on the edge of a much larger suburban area (i.e. Greater London).

Despite the presence of primary and secondary schools in the settlement, there is a known high level of pupil exchange between Chigwell and Redbridge and Woodford, which again contributes to the way in which Chigwell operates more as a large village.

**Qualitative Analysis**

Chipping Ongar is to the east of the District, set within open farmland. The A414 connects the settlement with Chelmsford to the east, and North Weald and Harlow to the west. Brentwood is to the south, with an expanse of farmland dotted with rural settlements to the north. Chipping Ongar serves a large rural hinterland, and provides an important function within a large geographic area.

There are a number of bus services that connect Chipping Ongar with surrounding settlements. The nearest Central Line station is in Epping, with the nearest rail stations being in Shenfield, Brentwood, Harlow and Chelmsford. The former Central Line station in Chipping Ongar is now run as a heritage route. The Cross Rail station at Shenfield is due to be serviced by a new fleet in 2017, with Cross Rail being fully open in 2019.

Chipping Ongar is characterised by its historic core (leading to its identification as a historic town by Essex County Council in 1999), with a number a peripheral newer residential areas. Shelley, to the north of the A414 and main centre, provides a number of its own services and facilities. However, unlike other settlements within the District the split nature of the settlement does not lead to the settlement being suggested for a different category than the scoring reflects. This is due to the position of Chipping Ongar in the District, sitting within a large rural area, which has the effect of making the settlement a more cohesive whole.

### Qualitative Analysis

Epping is broadly central within Epping Forest District, to the north of the M25 and west of the M11. The Central Line terminates in Epping, and the only general access hospital (no Accident and Emergency) in the District is located to the north east (St Margaret's).

The main shopping centre in Epping provides a number of shops, restaurants and associated facilities, with both independent and chain stores. There are a number of bus services that connect Epping to Harlow, Chelmsford, Loughton and beyond. The settlement as a whole provides the majority of services and facilities that have been assessed in this analysis.

Essex County Council identified Epping as a historic town in 1999, and this is further supported by the presence of two conservation areas.

**TOTAL**: 8

### Qualitative Analysis

Fyfield is a small settlement to the north east of Ongar, set within rural farmland. There is a small primary school and a local shop and post office, that would cater to some everyday requirements of residents, but for the majority of demands travel to larger nearby settlements would be necessary.

### Settlement Category

### Qualitative Analysis
High Beach/Beech is in the south west of the District, to the immediate west of Loughton and the main part of Epping Forest. The area is not currently defined, and is entirely washed over by the Green Belt.

There are a small number of local services that would cater to some everyday requirements of residents, but for the vast majority of demands travel to larger nearby settlements would be necessary.

Parking also available at Clifton Road. |

**TOTAL** 27

**Qualitative Analysis**

Loughton and Debden together form the largest settlement in the District. It is located to the south of the District, to the west of the M11 and immediately to the east of the main part of Epping Forest. The River Roding and its flood plain lie to the east providing a gap to the M11.

It has not proved possible to separate Loughton and Debden satisfactorily, and the assessment reflects that together these areas form a single settlement. The majority of services are present in each area, and therefore to attempt to separate the settlements from each other would lead to the same conclusion and placement in the hierarchy. All of the services and facilities included in this assessment are present in Loughton and/or Debden, with the exception of a mainline rail station and hospital.

- Public Car Park: Y, In front of Nazeingbury Parades

**TOTAL**: 10

### Qualitative Analysis

Lower Nazeing is on the western edge of the District, adjoining the Borough of Broxbourne. The settlement is partly within the Lee Valley Regional Park on its western boundary, and is within a broad area that contains a large number of horticultural glasshouses. HGV traffic as a result is noted as an issue for the small rural roads.

There are a number of services and facilities present that would also serve the wider rural area, including smaller settlements such as Bumble’s Green and Nazeing village.

Lower Nazeing is connected by bus services towards Waltham Abbey, Broxbourne, Roydon and
Harlow.

Qualitative Analysis

Lower Sheering is on the District boundary with East Hertfordshire to the north. There are few services within Lower Sheering itself, and the settlement effectively functions as part of Sawbridgeworth to the west. Lower Sheering and Sawbridgeworth are separated by the River Stort and its flood plain. There are two crossing points over the river at Sheering Mill Lane and Station Road. Station Road in particular gives the impression of a continuous built area.

Sawbridgeworth mainline rail station is on the District boundary at the north western end of the settlement, and the small retail centre of Sawbridgeworth is a short distance away further along Station Road. Both primary and secondary schools are contained within Sawbridgeworth.
Lower Sheering is a difficult settlement to categorise, given its proximity and relationship with Sawbridgeworth. Taking Lower Sheering in isolation, the score awarded indicates it should be considered a hamlet. Taking into account the wider area, and the settlement hierarchy established by East Herts District Council, the Sawbridgeworth/Lower Sheering settlement could be argued to form a town. Any proposal for change would need to be undertaken in coordination with East Herts District Council and Hertfordshire County Council, and could be restricted by any identified service capacity issues within Sawbridgeworth.

**TOTAL**: 8

### Qualitative Analysis

“Matching” refers to the combined network of neighbouring settlements of Matching, Matching Green and Matching Tye, set within open farmland in the north east of Epping Forest District. While historically recognised as separate hamlets, their close proximity has led to the three hamlets operating as an individual settlement.

There are some local services that would cater to some everyday requirements of residents, but for the majority of demands travel to larger nearby settlements would be necessary.

**TOTAL** 15

#### Qualitative Analysis

North Weald is broadly central to Epping Forest District, to the immediate east of the M11 and north of the M25. The settlement is split by the A414 which passes broadly east-west at the northern edge, running between Harlow and Chipping Ongar, and Chelmsford beyond.

There are a range of services, although the doctors surgery is a satellite of The Limes surgery in...
Epping, and does not offer a full range of services. There is a small parade of shops, including a small Cooperative store, which provides for daily basic shopping requirements.

The former Central Line, and the station in North Weald are now part of a heritage route.

North Weald Airfield has been subject to several studies in the recent past, and this has culminated in the preparation of a Masterplan to guide the possible future development of the settlement. This takes into account the proximity of Harlow and Epping, and known transportation issues included local congestion.

**Settlement category**

**TOTAL** 14

### Qualitative Analysis
Roydon is at the north western edge of Epping Forest District, in close proximity to Harlow. Roydon has a mainline rail station, which sits on the District boundary with East Hertfordshire District Council. There are a small number of services on High Street, with several of the assessed services provide by McColl's newsagents. At the time of writing (Sept 2015), McColl's was closed following a ram-raid incident. It is too early to know whether and when the shop and Sub-Post Office will re-open, but in the event it becomes clear that the shop will not re-open, this assessment will be reviewed.

Roydon Playing Fields contains a playground, hard surfaced tennis courts and changing facilities, in addition to football pitches and a cricket pitch. The Playing Fields are home to local football, cricket and tennis clubs, and the changing facilities are integral to the operation of at least the football and cricket teams. For this reason, the Playing Fields are included in both categories, as they meet a range of demands for leisure and sports uses.
Roydon is bounded to the west by the Lee Valley Regional Park. It contains a Conservation Area across the main area of the High Street, and also forms part of the Nazeing and South Roydon Conservation area.

Strong representations have been received from local Ward Councillors, and the Parish Council on the position of Roydon in the Settlement Hierarchy. There is a recognition that the services to the train station are on the “stopping service” and are therefore less frequent at Roydon than at Harlow Town, for example. Both car parking and overall station facilities are limited, and opportunities for further enhancement and improvement are limited. Whilst Roydon contains the necessary number of services and facilities to be considered a large village, when taken in comparison with other settlements in both this category and the “small village” category, it would appear to fit more comfortably within the small village category.

- Library: **N**
- Police Station: **N**
- Citizens Advice Bureau: **N**
- Public Car Park: **N**

**TOTAL** **6**

### Qualitative Analysis

Sewardstone is characterised by linear development along Sewardstone Road, between the southern edge of Waltham Abbey and the northern edge of Chingford. There is no discernible centre, and there are few services within the settlement itself. The score achieved is largely a reflection of the frequency of bus services along Sewardstone Road.

Residents of this area would have to travel to meet the majority of their daily requirements for education, health, retail and community facilities.

### Settlement Category

Hamlet
### Sheering

<table>

- **Public Car Park**: N

**TOTAL**: 9

### Qualitative Analysis

Sheering is to the immediate east of the M11 at the northern edge of the District. It is a small settlement contained within rural farmland. There are some local services that would cater to some everyday requirements of residents, but for the majority of demands travel to larger nearby settlements would be necessary.

### Settlement Category

Small Village
### Stapleford Abbots

- **Citizens Advice Bureau**: N
- **Public Car Park**: N

#### TOTAL: 17

### Qualitative Analysis

Theydon Bois is to the south of the M25 and the west of the M11, to the north of Loughton/Debden. The settlement is served by London Underground, and the central part of the settlement contains a small parade of shops, restaurants and pubs. Further, there is a primary school, pre-school and youth club in the village.

Theydon Bois is largely constrained to the west by parts of Epping Forest, and is bounded to the east by the Central Line.
| Settlement Category | Large Village |
### Figures are based on the portion of Epping Lindsey and Thornwood Common Ward which is not located within Epping Parish. This includes rural areas outside of the settlement itself.

### Qualitative Analysis

Thornwood is to the north of Epping, and is characterised by a range of property types, styles and ages. The B1393 road passes broadly north-south through the village, and the frequency of bus services along this route contributes heavily to the score achieved. There are some local services that would cater to some everyday requirements of residents, but for the majority of demands travel to larger nearby settlements would be necessary.

</table>

**Qualitative Analysis**

Waltham Abbey lies to the west of the District, immediately to the north of the M25 and close to the boundary with the Borough of Broxbourne. The historic core and the presence of the Royal Gunpowder Mills to the west of the centre have led to Waltham Abbey being identified as a historic town by Essex County Council in 1999.

The majority of services and facilities assessed are present in Waltham Abbey, clearly identifying it as a town.
